

How to Create Your ATPE Account

In order to access the members-only sections of the ATPE website you will need to register for an ATPE account. You will need your ATPE membership ID number to create an ATPE account.

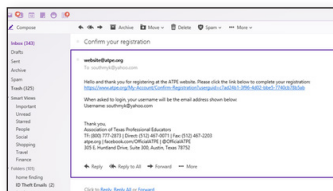

1 Register for your ATPE account at: www.atpe.org/en/My-Account/Register-Existing-Member

Be sure to use your most-frequently accessed email address (preferably your home address so we can avoid issues with campus spam filters). Also, note that your password will need to contain a special character (such as ?, !, or @).

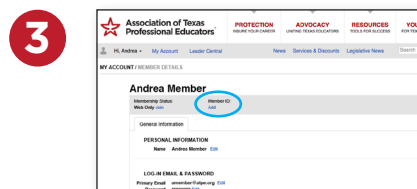

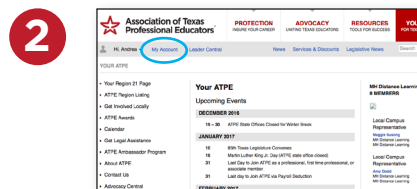

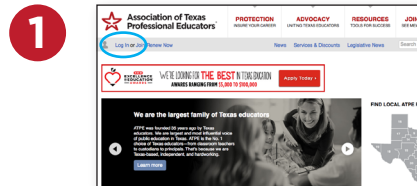

2 Check your email and activate your ATPE account.

Once you register you will receive a "Confirm Your Registration" email. If you don't receive it right away, be sure to check your junk/spam folder for this email. It contains a link that will activate your ATPE account. You will not be able to log in until you have clicked on this link.

If you have an ATPE account but have not yet sync'd it with your membership number, read this:

Have your membership number handy. Log into your ATPE account at ATPE.org. Now, select MY ACCOUNT at the top left side of the page, then select the ADD button next to Member ID. After this is added, your members-only additional functions on the website will become available.

Please reach out to the membership department if you have any other questions or concerns!
